Minigran Eco-Sol 1

2-1-2

Homogeneous, granular, compound fertilizer in Minigran® form

GUARANTEED ANALYSIS

Total Nitrogen (N)	2.0%
2.0% Water Insoluble Nitrogen*	
Available Phosphate (P ₂ O ₅)	1.0%
Soluble Potash (K ₂ O)	2.0%

Derived from: Cocoa Shell Meal and Soybean Meal

*Contains 2.0% slow release nitrogen from Cocoa Shell Meal and Soybean Meal

For Professional or Commercial Use Only

Directions for use – Apply only as directed

<u>TURF</u>

Application rate for turfgrass (per application) 10-50 lbs/1000 sqft.

The exact rate of Minigran Eco-Sol 1 depends on the needs of the turfgrass, the time of application, the condition of the soil and the intensity of irrigation.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn and sweep any product that lands on the driveway, sidewalk, or street, back onto your lawn.

FL Requirements for Fertilizer Use: For applications on Sports Turf, Golf Courses, Parks and Recreation Fields – please comply with the FL DEP Green Industries Best Management Practice guidelines.

MD Requirements for Fertilizer Use: Do not apply this product at more than 0.9 lbs Nitrogen per 1000 sq ft.

MI Requirements for Fertilizer Use: For applications to turf – please comply with the requirements as set out in section 324.8512b of the Michigan Fertilizer law.

HORTICULTURE and AGRICULTURE

Application rate

- Field cultivation (per application) 440-2230 lbs/acre
- Potting soil (per application) 2-3 lbs/yd³

The exact rate of Minigran Eco-Sol 1 depends on the need of the plant, the time of application, the condition of the soil/potting soil and the intensity of irrigation.

Observe all local and state laws regulating fertilizer usage.

Keep out of reach of children and pets. Do not eat or drink the product. Do not use as animal feed. Store in cool, dry conditions. Ideal storage conditions are 32°-86° F and below 70% relative humidity. Close package tightly after each use.

Product advice is intended to be used for informative purposes only and does not imply any commitment or agreement. The instructions for use are based on many years of practical experience and research. Each plant and each cropping system has its own nutritional requirements. The time of application, nutrient reserves in the soil/growing medium and statutory fertilization standards are also important in determining fertilizer application rates. It is advisable (good practice) to always test new product applications on a small scale first. Fertilizers may cause EC to increase and can affect the pH level. All of these factors are essential to consider when using one fertilizer product or when combining different fertilizers. Growing media to which fertilizer products have been added should be used as soon as possible after delivery. DCM USA LLC accepts no liability for consequential damage caused by the use of its products.
