# DISEASE CONTROL

FOR ORGANIC GARDENING

## Proven Bee Safe®

At Earth's Ally, we are committed to protecting our pollinators and offer a complete lineup of Bee Safe® gardening products that have been scrutinized and tested by independent laboratories.

## Made with Recycled Plastic

By 2023, our packaging will be made with Post-Consumer Recycled materials. PCR bottles decrease the environmental impact of packaging, requiring fewer fossil fuels, emissions and water.

## Eco-Friendly Concentrates

Save money, save time, save the planet. We pass along the efficiencies associated with not shipping water around the country to consumers. One quart of concentrate is equal to 50 spray bottles.

## Field Tested, Farmer Approved®

It's what farmers use. We searched the organic agricultural industry to find companies that have developed effective OMRI Listed® formulas and bottled them specifically for the home gardener.

## Proudly Made in the USA

Manufactured by Sarasota Green Group and proudly made in America. Our team is passionate about providing solutions for our customers that are safe, effective and responsible.

## DIRECTIONS FOR USE

- Shake the formula well
- Apply a fine mist to the stems, leaves and undersides
- Thoroughly cover the plant until there is runoff
- For heavy disease, wait 4 hours then repeat application a second time
- Repeat this process every 5-7 days, as needed

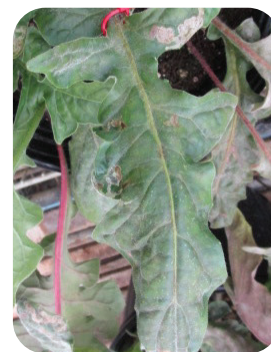

**Save money, save time, save the planet. Each quart of concentrate is equal to 50 ready-to-use spray bottles.**

## KILLS POWDERY MILDEW

BEFORE

AFTER 24 HOURS

Independent testing results. Powdery Mildew on a Gerbera Daisy treated with one application of Earth's Ally® Disease Control.
