

# SureGuard® EZ

HERBICIDE

## LASTING RESIDUAL WEED CONTROL REDUCED LABOR AND COSTS

SureGuard® EZ Herbicide delivers long-lasting pre-emerge residual control of grass and broadleaf weeds saving time and costs associated with re-application. SureGuard EZ takes down postemerge weeds up to 2" in height for a wider application window with the same long-lasting residual control, often spanning six months or more. SureGuard EZ is ideal for landscape beds, bare ground areas, dormant Bermudagrass and aquatic weeds.

SureGuard EZ offers easier mixing and handling than SureGuard SC. When tank-mixed with glufosinate (Cheetah® Pro) or glyphosate, SureGuard EZ enhances the speed and spectrum of weed control provided by nonselective herbicides, while providing a barrier of weed control all season long.

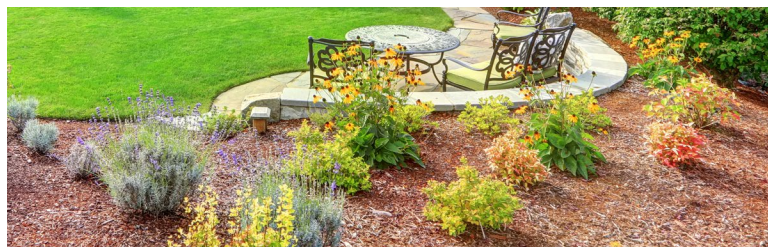

### COMPETITIVE ADVANTAGES

#### SAVE TIME, MONEY AND LABOR

- Easier mixing, handling and cleaning through reduced foaming and surface adherence
- Non-staining spray formulation with no color or off-target movement for precise landscape bed edges
- Apply once – long lasting residual pre-emerge control
- Reduce customer callbacks with lasting broad-spectrum control

#### GAIN FLEXIBILITY

- Wide application window: SureGuard EZ also controls post-emerge weeds up to 2" – if timing is off, emerged weeds are still controlled
- One product for many uses: landscapes, bare ground, aquatics, cracks, crevices and dormant Bermudagrass
- Mix with glufosinate or glyphosate for fast and effective knockdown with long lasting residual, even on resistant weeds

Landscape bed treated with SureGuard EZ + glyphosate

### AT-A-GLANCE INFO

EPA REG. NO. 59639-260

ACTIVE INGR. flumioxazin

FORMULATION liquid SC

CHEM. FAMILY N-phenylphthalimide

HRAC NO. 14

SIGNAL WORD caution

RESTRICTED no

PACKAGE SIZE 8 x 1 pt, 4 x 64 fl oz

# SureGuard® EZ

## HERBICIDE

### REDUCE LABOR AND COSTS WITH LASTING RESIDUAL CONTROL.

#### KEY USES

Landscape ornamental beds, around woody shrubs, deciduous trees and conifers

Dormant Bermudagrass on residential and commercial lawns, golf courses, sport fields, schools and sod farms

Non-crop areas: around buildings, fencerows, gravel surfaces, driveways and ground mats

Lakes, ponds, reservoirs, canals ditches, marshes and other aquatic sites

#### KEY WEEDS CONTROLLED

(See product label for complete list)

Annual bluegrass	Puncturevine
Barnyardgrass*	Ragweed
Bittercress	Redmaids
Chickweed	Russian thistle
Crabgrass*	Shepherd's-purse
Dandelion*	Spiny amaranth
Eclipta	Spurge
Field pennycress	Velvetleaf
Florida	Waterhemp
beggarweed	Yellow rocket
Florida pusley	*Pre-emerge only
Foxtail*	
Goosegrass*	<b>AQUATIC WEEDS</b>
Groundsel	Algae
Kochia	Filamentous
Lambsquarters	Alligator weed
Morningglory	Duckweed
Moss	Frog's-bit
Nightshade	Mosquito Fern
Palmer amaranth	Water fern
Pigweed	Water lettuce
Pineapple-weed*	Watermeal

#### OVER-THE-TOP CONIFER TIP

SureGuard EZ may be applied over-the-top to many dormant (hardened off) conifer plants. As a rule, never apply before 2 hard freezes and never after spring bud break.

**32°** **32°**  
FREEZE 1 FREEZE 2

#### RESISTANCE MANAGEMENT

Pre-emerge herbicide rotation is an important resistant management tool. SureGuard EZ is a group 14 herbicide, rotate with, or tank mix with, other pre-emerge group herbicides.

#### GAIN FLEXIBILITY: A WIDER APPLICATION WINDOW

SureGuard® EZ offers a significant advantage over the competition, it controls pre-emerge weeds as well as emerged weeds up to 2" high. When application timing is running a little behind, rest assured that both pre- and post-emerge weeds are captured with SureGuard EZ.

##### PRE-EMERGE CONTROL

Make application to the soil surface prior to weed emerge. Do not apply to the foliage, green stems or exposed roots of desirable plants. Moisture is needed to move SureGuard EZ into the soil. Dry weather following application may reduce effectiveness. However, when adequate moisture is received after dry conditions, susceptible germinating weeds will be controlled.

##### POST-EMERGE CONTROL

For best results, apply to actively growing weeds less than 2" in height. For most effective post-emerge weed control, apply with a surfactant under sunny conditions at temperatures above 65°F. SureGuard EZ is rainfast in 1 hour, do not apply if rain is expected within 1 hour.

#### GAIN OPTIONS: ONE PRODUCT FOR MANY USES

SureGuard EZ is labeled for use on many sites. Take care of landscape beds, cracks and crevices, bare ground areas, dormant Bermudagrass, aquatic sites and more.

##### ESTABLISHED WOODY LANDSCAPE ORNAMENTALS

Apply as directed sprays around well-established woody shrubs and trees. Do not apply around landscape ornamentals for at least 30 days after transplant, or at least 2 months before ornamentals will be planted.

##### BARE GROUND NON-CROP AREAS

Use for non-selective vegetation control to maintain bare ground non-crop areas. Do not apply when weather conditions favor spray drift from treated areas.

##### TURF AND ORNAMENTAL SITES

Keep areas in and around woody shrubs, deciduous trees, and conifers weed free with broad-spectrum pre- and early post-emerge control. Do not apply to stressed plants.

##### CONTAINER- AND FIELD-GROWN DECIDUOUS TREES AND CONIFERS

Apply as single or split applications to established trees. Do not apply to trees or transplants less than 1 year. May apply over the top only if bud break has not occurred or plants are hardened off.

##### AQUATIC WEED CONTROL

Control floating or emerged weeds using surface applications or floating and submersed weeds using subsurface applications. For most effective control, apply to actively growing weeds in water with a pH of less than 8.5.

#### WARM-SEASON TURF TIP

**1x** **OR** **2x**  
SINGLE APP SPLIT APP

Apply as single or split applications to well established dormant Bermudagrass to control annual bluegrass, winter annuals. Apply late winter to dormant Bermudagrass for summer annuals including goosegrass and crabgrass.

See label for more weed resistant management strategies.
